B.Tech. DEGREE EXAMINATION, NOVEMBER 2019

First and Second Semester

18LEH101J - ENGLISH

(For the candidates admitted during the academic year 2018-2019 onwards)

Note:

- (i) **Part - A** should be answered in OMR sheet within first 45 minutes and OMR sheet should be handed over to hall invigilator at the end of 45th minute.
- (ii) **Part - B** and **Part - C** should be answered in answer booklet.

Time: Three Hours

Max. Marks: 100

PART – A (20 × 1 = 20 Marks)

Answer **ALL** Questions

- The process of communication involves _____, encoding, channelizing, decoding and feedback.
 (A) reading (B) ideation
 (C) skimming (D) writing
- _____ is a type of speech delivered without any prior intimation and preparation.
 (A) extemporaneous (B) manuscript
 (C) impromptu (D) memorization
- Study about pitch and articulation in speech is called _____.
 (A) Proxemics (B) Kinesics
 (C) Paralinguistic (D) Psycholinguistics
- _____ is defined as “a groove or notch made by a cutting tool, such as a saw or an axe”.
 (A) an edge (B) kerf
 (C) hole (D) slant
- Choose the appropriate passive voice form of the following sentence:
 They will demolish the entire block.
 (A) The entire block is being demolished by them (B) The entire block may be demolished by them
 (C) The entire block will have to be demolished by them (D) The entire block will be demolished by them
- The usage *once in a blue moon* is considered to be a _____.
 (A) niche (B) redundancy
 (C) cliché (D) aberration
- Project proposal is a _____.
 (A) specially designed report (B) document that presents a plan of action
 (C) report written for a specific purpose (D) document for granting fund

8. Which of these punctuation mark is used between sentences that are grammatically independent?
 (A) colon (B) semicolon
 (C) comma (D) hyphen
9. Flowchart is a pictorial representation of -----.
 (A) process description (B) comparative analysis
 (C) trend (D) opinion survey
10. A report is _____.
 (A) an official document written for a specific purpose and for a specific audience (B) a record for common purpose
 (C) an arrangement of facts (D) none of the these
11. When Carol called last night, I _____ my favourite show.
 (A) had been watching (B) was watching
 (C) watched (D) was watched
12. We were late because we _____ some problems. By the time we reached home, Susan _____ for us for more than two hours.
 (A) have, was waiting (B) had, was waiting
 (C) had, had been waiting (D) had, waited
13. The verb form of 'etymology' is _____.
 (A) etymologize (B) etymice
 (C) etymological (D) etymol
14. Words that have the same spelling but different meanings with different pronunciations are _____.
 (A) homonyms (B) homophones
 (C) homographs (D) cryptonyms
15. Choose the correct homonym:
 The plane's ---- made my ears pop.
 (A) assent (B) ascent
 (C) accent (D) asent
16. Feasibility report studies the _____ of carrying out a project.
 (A) parts (B) budget
 (C) problems (D) practicability
17. "Use the freedom judiciously". This is -----.
 (A) instruction (B) request
 (C) rule (D) recommendation
18. Choose the correct parallel structure:
 Joe likes _____.
 (A) running, walking, and being active (B) running, walking and outdoor activities
 (C) running, walking, and be active (D) runs, walking, and be active

19. Choose the appropriate word to complete the analogy that is closest to the one given:

BEES: HIVE

(A) Students: Classroom

(B) Church: Devotee

(C) Bears : Den

(D) Teacher: Cabin

20. Convert the following direct speech into indirect speech:

She said, "My mother is cooking food"

(A) She said that her mother was cooking (B) She said that her mother is cooking food
food

(C) She said that my mother was cooking (D) She said that my mother is cooking food
food

PART – B (5 × 4 = 20 Marks)

Answer ANY FIVE Questions

21. Non-verbal communication enhances the effectiveness of communication. Justify.

22. Write a paragraph of 100 words describing a scene of accident to which you were an eyewitness.

23. Write extended definitions of the following terms: (i) Artificial Intelligence (ii) Fundamental Rights

24. What is a proposal and how is it different from a report?

25. Write a checklist of about eight points regarding arrangement of a guest lecture in the Seminar hall.

26. Write a short review on any movie you have watched recently.

27. Make notes on the given passage:

The tests of life are its plus factors. Overcoming illness and suffering is a plus factor for it moulds character. Steel is iron plus fire, soil is rock plus heat. So let's include the plus factor in our lives. Sometimes the plus factor is more readily seen by the simple hearted. Myers tells the story of a mother who brought into her home – as a companion to her own son- a little boy who happened to have a hunch back. She had warned her son to be careful, not to refer to his disability. The boys were playing and after a few minutes she overheard her son say to his companion "Do you know what you have got on your back?" The little boy was embarrassed, but before he could reply, his playmate continued " It is the box in which your wings are, and some day God is going to cut it open and then you will fly away and be an angel." Often it takes a third eye or a change in focus, to see the plus factor. Walking along the corridors of a hospital recently where patients were struggling with fear of pain and tests, I was perturbed. What gave me a fresh perspective were the sayings put up everywhere, intended to uplift. One saying made me conscious of the beauty of the universe in the midst of pain, suffering and struggle. The other saying assured me that God was with me when I was in deep water and that no troubles would overwhelm me. The import of those sayings also made me aware of the nether springs that flow into people's lives when they touch rock bottom or are lonely or guilt ridden. The nether springs make recovery possible, and they bring peace and patience in the midst of negative forces. The forces of death and destruction are not so much physical as they are psychic and psychological. When malice, hatred and

hard heartedness prevail, they get channeled as forces of destruction. Where openness, peace and good heartedness prevail, the forces of life gush forth to regenerate hope and joy. The life force is triumphant when love overcomes fear. Both fear and love are deep mysteries, but the effect of love is to build, whereas fear tends to destroy. Love is generally the plus factor that helps build character. It creates bonds and its reach is infinite. It is true there is no shortage of destructive elements – forces and people who seek to destroy others and in the process destroy themselves – but at the same time there are signs of love and life everywhere that are constantly enabling us to overcome setbacks. So let's not look at gloom and doom – let us seek positivity and happiness. For it is when you seek that you will find what is waiting to be discovered.

PART – C (5 × 12 = 60 Marks)

Answer **ALL** Questions

28. a. Read the passage carefully and answer the following questions.

Most of the fastening devices used in clothing today, like the shoelace, the button, and the safely pin, have existed in some form in various cultures for thousands of years. But the zipper was the brainchild of one American inventor, namely Whitcomb Judson of Chicago. At the end of the 19th century, Judson was already a successful inventor, with a dozen patents to his credit for mechanical items such as improvements to motors and railroad braking systems.

He then turned his mind to creation a replacement for the lengthy shoelaces which were then used in both men's and women's boots. On August 29th 1893, he won another patent, for what he called the "clasp-locker". Though the prototype was somewhat clumsy, and frequently jammed, it did work: in fact, Judson and his business associate Lewis Walker had sewn the device into their own boots. Although Judson displayed his clasp-locker at the World's Fair held in Chicago in 1893, the public largely ignored it. The company founded by Judson and Walker, Universal Fastener, despite further refinements, never really succeeded in marketing the device.

The earliest zip fasteners were being used in the apparel industry by 1905, but it was only in 1913, after a Swedish-American engineer, Gideon Sundbach, had remodeled Judson's fastener into a more streamlined and reliable form, that the zipper was a success. The US Army applied zippers to the clothing and gear of the troops of World War I. By the late 1920s, zippers could be found in all kinds of clothing, footwear, and carrying cases; by the mid-1930s, zippers had even been embraced by the fashion industry.

The term "zipper" was coined as onomatopoeia by B. F. Goodrich, whose company started marketing galoshes featuring the fastener in 1923. Regrettably, Whitcomb Judson died in 1909, and never heard the term, or saw the success by which his invention would become ubiquitous.

- (i) The zipper differs from the other three fastening devices mentioned in paragraph 1 in which way?
- (a) it has been used in many more ways
 - (b) it is more recent
 - (c) it can be used in place of the other three
 - (d) it is usually made from different materials
- (ii) The word "prototype" in line 8 is closest in meaning to
- (a) device
 - (b) design
 - (c) model
 - (d) original

- (iii) What is the author's main point in the second paragraph?
 - (a) despite being a successful inventor, Judson failed with the clasp-locker
 - (b) Judson lacked marketing skills
 - (c) Judson was a poor businessman
 - (d) Although Judson invented a workable product, it did not appeal to the public
- (iv) The word "it" in line 11 refers to
 - (a) Judson (b) Clasp-locker (c) World's Fair (d) The public
- (v) The word "refinements" in line 12 is closest in meaning to
 - (a) improvements (b) changes (c) promotion (d) additions
- (vi) According to the passage, zippers did not really become a success until
 - (a) they were used in the apparel industry after 1905
 - (b) in 1913 after being remodeled
 - (c) the Army used them in World War I
 - (d) in the late 1920s
- (vii) The word "gear" in line 16 is closest in meaning to
 - (a) boots (b) luggage (c) equipment (d) tents
- (viii) According to the passage, by the late 1920s zippers could be found in all of the following industries except
 - (a) footwear (b) luggage (c) tents (d) fashion
- (ix) The word "embraced" in line 18 is closest in meaning to
 - (a) welcomed (b) considered (c) discarded (d) promoted
- (x) According to the passage, the zipper got its name
 - (a) when used in clothing (b) in 1909
 - (c) from Judson (d) because of its sound
- (xi) Which of the following descriptions best describes the author's last comments about Judson?
 - (a) admire (b) sad (c) envy (d) celebrate
- (xii) Which of the following statements can best be inferred from the passage about zippers?
 - (a) the imaginative name was a major factor in its success
 - (b) a successful model had been developed commercially before Sundback's version because it was used in the apparel industry by 1905
 - (c) Judson was an inventor, not a business man
 - (d) If Judson had still been alive by World War I his company would have been more successful

29. a. Convert the following passage into a flowchart.

All cell phone manufacturer's start the process in the conceptual phase. Several sketches and wireframes are created using different designs, features, and interface options, such as keypad only and touchscreen. These sketches also determine the phone's weight, scale, size and portability. Because the goal of most phones is to be compact and portable, this phase is the most intensive. During this process, a team decides what designs will become prototypes. Once a list is determined, several prototypes are created. These models are usually non-

functional and only for visual purposes. Prototypes are constructed from plastic, Styrofoam and other re-usable materials. Once a final design is created, the concept is pushed to engineers, who decide what electronics are necessary. The key part of every cell phone is its electronics. The electronics control everything from the way the phone displays information, places calls, and sends location information and more. Depending on the features determined during the conceptual phase, different electronics can be used. For most cell phones, there are three key components: a printed circuit that controls the keypad and signal reception, a battery, and screen. In addition to the hardware, software is also required for the phone to operate. Almost all cell phone manufacturer's use proprietary software for their phones. The software is designed by a series of programmers that develop the design of the interface, the phone's basic/advanced operations, and other features. By default, most modern cell phones are programmed with basic features like text messaging, calendar and clock. After these components and software are determined, the phone moves on to final construction. Each piece of the cell phone is created separately. First, the casing for the phone is made. Most cell phones use a simple plastic that is created using a process known as injection molding. Once the casing is created, the printed circuit board is made and loaded with the necessary software/operating system. The circuit board is then placed in the casing, using a series of eyeglass screws. Next, the other components of the phone are added: screen, keypad, antenna, microphone and speaker. After the phone is constructed, it is moved on to testing. During the testing phase, the battery for the phone is added and a worker checks the phone for power, button functionality and reception. Finally, the necessary documentation for the phone is produced and sent to be packaged with the phone. Once all of these components are verified, the phone is packaged and shipped to retail outlets.

(OR)

- b. Write a paragraph with a suitable title in about 200 words presenting the information furnished below about the using expressions of comparison.

30. a. Consider yourself as the Secretary of cultural fest in your University; draft a notice, agenda and minutes of the meeting discussing the various events to be organized for the fest.

(OR)

- b. Ford India Pvt. Ltd requires graduates from automobile department with a minimum of two years' experience. Send your resume to the HR, Ford India Ltd., Chennai.

31. a. Imagine you are applying for a UGC project to study about the weather condition in your locality. Write a project proposal stating the purpose and costs for the purchase.

(OR)

- b. Write an investigative report about the fire accident happened in the warehouse owned by Leather Company.

32. a. Write an essay of 300 words on the causes and effects of increasing crime among youth.

(OR)

- b. Write an essay of 300 words on the cultural transformation in the 21st century.
